

Stay Connected—Tutoring Minutes!

Dear family,

In a perfect world, every student would be successfully completing assignments with little trouble and needing no extra help. However, I know from teaching math for several years that this is not the case for many students. **Even the brightest students need extra support for some lessons, units, or even entire subjects.** In order to ensure that students succeed, we offer extra support through tutoring delivered by our highly knowledgeable teachers. These tutoring sessions give your child the one-on-one visual interaction necessary to overcome difficult concepts. Your child's success will build confidence necessary to becoming a lifelong learner.

Here is how it works. Visit our ["Tutoring Services"](#) page to purchase tutoring minutes to be used in any subject. You may then schedule a session directly with the teacher of the subject in need by contacting the teacher through the student's Ignitia account. Sessions can be scheduled any time convenient for you Monday through Friday from 8 a.m. to 4 p.m. (PST). However, scheduling a session with a specific teacher may be less flexible. Some things that we can offer your child during a tutoring session include:

- One-on-one help with challenging assignments via telephone and screen share
- Personalized instruction based on your specific child's needs
- Instant feedback on issues and achievements
- Additional instruction on study skills and best practices

Tutoring sessions from Enlightium Academy are very flexible, working with the needs of your family. Ways to use your purchased tutoring minutes include:

- Tutoring in one or all of your subjects
- Sharing tutoring minutes among students in the same household
- Saving unused minutes for future sessions, including carrying over minutes into the next school year

Here are some tips to take advantage of your tutoring sessions. Before scheduling a session, have your child write a list of concepts that he or she struggles with the most. Include specific questions that he or she may have about a lesson or assignment. During the session, make sure your child takes plenty of notes to use later.

We welcome your phone calls if you have any questions about tutoring. Our teachers are dedicated to seeing every child succeed without exception. We will do whatever it takes to ensure that your child achieves his or her academic goals!
