IXL
Testing Checklist

BEFORE TESTING

- [ ] Ensure that the testing device is fully charged and plugged into a power source. Keep it plugged in during testing.

- [ ] Have scratch paper available if desired (student may also write on the screen using the pencil tool in IXL if that is preferred)

- [ ] Make sure you have the correct link for IXL. You will want to have Enlightium as part of the link, otherwise the login information may not work. The login information will be sent the day of the test. https://www.ixl.com/signin/enlightium

STUDENT TESTING SPACE

- [ ] Create a comfortable testing space that includes a desk or table for the student.

- [ ] Remove distractions.

- [ ] Turn off TVs, music, and distracting noises.

- [ ] Plan for any siblings' activities to be away from the testing space.

PREPARING THE STUDENT

- [ ] Ensure that the student is rested and fed.

- [ ] Provide snacks and water.

- [ ] Set aside 2-4 hours for the test. The length of time can vary from student to student so it is better to plan for more time. If the test takes more than 3-4 hours to complete, then you are welcome to end the test/your student does not need to keep testing for longer than this.

- [ ] Plan for restroom breaks. Students are welcome to take breaks during the testing window as needed.

- [ ] Encourage students to do their best. Remind the student that this test is just to see what they know but will not reflect on their grade.

DURING TESTING

- [ ] Make sure the student does not have other browsers open

- [ ] Have a proctor in the room to make sure the student is following directions and not using any outside sources or help from others. This test is meant to check what the student knows and so having help will skew the results.

- [ ] Have the student select "I don't know this yet" if the student does not know the answer. This will make the results more accurate and also decreases the time for the test

IMPORTANT REMINDERS

- [ ] This test is meant to help identify areas of strength and growth for students but it does not affect their grade at all.

- [ ] If your student likes the IXL platform your student is welcome to keep using IXL as a supplemental resource for free while enrolled at Enlightium.

- [ ] Email ixl@enlightiumacademy.com if you have any questions.
